

Amendments to the Claims

This listing of claims replaces all prior versions and listings of claims in the application.

Listing of Claims:

1. (Currently Amended) A change-over apparatus for a broadcasting duplex system including a pair of devices comprising a main device and a backup device, wherein the change-over apparatus comprising:

a switch that is connected to receive an output signal from the main device and an output signal from the backup device; and

a switching controller that is connected to receive the output signal from the main device and the output signal from the backup device and controls the switch, the switching controller comprising a monitor including:

a digital monitor that performs switches between said pair of devices based on digital monitoring for monitoring the output signal from the main device and the output signal from the backup device a signal associated with said duplex system from a digital signal aspect,  
and

an analog monitor that performs analog monitoring for monitoring the output signal from the main device and the output signal from the backup device from an analog signal aspect,

wherein the switching controller controls said switch based on a signal from the monitor to change over from the main device to the backup device.

2. (Cancelled)

3. (Currently Amended) A change-over apparatus according to claim [[2]] 1, wherein the switching controller operates based on one or both of [[said]] the digital monitoring and [[said]] the analog monitoring.

4. (Currently Amended) A change-over apparatus according to claim [[2]] 1, wherein [[said]] the digital monitoring and [[said]] the analog monitoring include monitoring related to standards associated with ~~said duplex~~ the broadcasting system.

5. (Currently Amended) A change-over apparatus according to claim [[2]] 1, wherein [[said]] the digital signal aspect includes an aspect of data represented by a digital signal.

6. (Currently Amended) A change-over apparatus according to claim [[2]] 1, wherein said analog signal aspect includes [[the]] a level of a signal.

7. (Cancelled)

8. (Currently Amended) A change-over apparatus according to claim [[7]] 1, wherein each of the [[said]] devices is a reference signal generator for the [[said]] broadcasting system.

9. (Currently Amended) A change-over apparatus according to claim [[7]] 1, wherein [[said]] the signal from the main device ~~associated with said duplex system~~ is a serial digital interface (SDI) signal.

10-22. (Cancelled)
